

XM radio is the best thing out there by far. What I get from it is what no other stations can provide for me, variety and quality! I drive all day for a living and having sattalite radio has made driving more pleasurable. I not only get no music interruptions, but I can tune in at anytime to get up to date weather and even more important, traffic! I feel that stopping these services is a complete outrage. I am paying for these services and choices, so I dont feel its up to NAB to tell me what I can listen to! I respecfully urge you (FCC) to REJECT the NAB's petition 04-160. I also would like the FCC to support XM's ability to give me the programming that I demand and deserve, since I am paying for it!
